

3rd-ICLS-KIBGE Conference on RESPONSIBLE CONDUCT OF SCIENCE

ICLS

November 14-15, 2011

Introduction

The advances in various fields of science bring incredible promises, on one hand; also carry potential harms and risks, on the other. The efforts on local as well as international levels are continuing to find out the ways to ensure that the sciences are to be used solely for our collective benefits. The proposed workshop on responsible conduct of science will provide a global forum to prevent the use of the sciences to cause deliberate harm and to discuss and to suggest the roles of scientific community to play in this regard.

Objectives

- To conceptualize the responsible conduct of science
- To idealize the science to be harmless to humanity
- To realize the scientific personnel in a way appropriate for society
- To optimize the contribution of scientists to the wider interest of society
- To improvise the safe, secure and ethical conduct of science

Topics to be covered

- Philosophy of Science
- Science and the Society
- Media and the Science
- Biosafety, Biosecurity and Ethics in Science
- Intellectual Property Rights in Science
- Commercialization of Science

Who should attend?

Scientists, researchers, teachers, postgraduates, undergraduate students from various scientific disciplines
